

Tullimbar Public School

Works notification | 13 May 2025

Dear staff, parents and carers,

On 5 May 2025 suspected mould was raised by a staff member in the library at Tullimbar Public School. An independent hygienist was engaged to inspect the area, provide advice and undertake sample testing. Clearance was provided to continue using the library as the inspection confirmed no visible mould was detected.

In addition to the testing, we have arranged for a building inspection and report to be undertaken to investigate any potential water leaks or condensation occurring in this building.

Once the testing and building report is received, we will undertake any recommended remedial work as advised by the independent hygienist.

Remediation work, if required, will include an environmental clean of the area with air cleaner machines in place. We will keep the community notified once further information and testing results are received.

If required, all work involving mould will take place during school hours, with appropriate safety measures in place.

Please be aware of the preventative measures as advised by [NSW Health's mould factsheet](#) to help avoid mould growth and follow these steps as best you can.

These measures include maximising natural ventilation where possible by opening windows and doors and using mechanical ventilation such as dehumidifiers as needed.

The health, safety and wellbeing of all members of our school and the local community are our highest priorities.

Thank you for your cooperation during this important work.
