

Beauty Point Public School

Works notification | 22 October 2025

Dear staff, parents, carers and neighbours,

Following the notification on [2 September 2025](#), we wish to provide you with an update on minor modifications made to the fence installed along the northern boundary at Beauty Point Public School.

Update on fence installation

The northern boundary fence is 1.8 metres high between the edge of the Sensory Garden paling fence and the edge of the Stage 3 classroom block.

The fencing panels then revert to 2.1 metre panels along to the Government Road gate. These panels were lowered into the concrete ground footing to allow a flush look instead of the steeped gap that was anticipated. This has resulted in this section of fencing being installed at a greater height than anticipated.

Unfortunately, it became apparent that the ground footings along the playground area were unstable. Consequently, the panels were installed directly into the kerb. A slightly higher retaining wall along the rear of the Stage 3 block however was able to accommodate the weight of the panels.

The health, safety, and wellbeing of all members of our school and the local community are our highest priorities. We will keep the community updated. Thank you for your cooperation during this important work.
