

Maitland Grossmann High School

Works notification | 6 February 2025

Dear staff, parents and carers,

Due to a recent storm, we have removed and replaced water-damaged flooring in the Technological and Applied Studies (Building D) administration entry area at Maitland Grossmann High School.

The material in the vinyl tiles underneath the carpet in this area contains bonded asbestos as listed on the school asbestos register.

NSW Health explains that 'living or working with asbestos, or just being around it, is a low risk to your health as long as the asbestos is in good condition and not damaged'.

Work to remove and replace the flooring took place during the recent school holidays on Thursday 23 January 2025.

All work involving asbestos-containing materials took place outside of school hours. All work was done in accordance with work health and safety laws and the NSW Department of Education's Asbestos Management Plan. All work was completed by licensed asbestos contractors and monitored by independent hygienists.

Following the work, the area was inspected by the independent hygienist and clearance provided.

The health, safety and wellbeing of the school and the local community is our highest priority.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your cooperation during this important work.
