

Maitland Grossmann High School

Works notification | 2 September 2025

Work is underway to improve the operations and amenities at Maitland Grossmann High School. This work is being undertaken while we explore options for the school facilities into the future.

Improvement work

On Saturday 30 August 2025, the new vocational education and training (VET) hospitality kitchen demountable was installed.

Work on the demountable interior will start over the next few weeks and continue in to the October school holidays. We are expecting the kitchen will be ready for students and staff to use early in Term 4 2025.

Maintenance work between Block C and D

On Wednesday 27 August 2025, during maintenance work, suspected asbestos containing fragments of building material were found on the ground between Block C and D.

The area is located within the Block E construction site which is separated by fencing and hoarding and is inaccessible to staff and students. Maintenance work ceased and additional safety measures were put in place while an independent hygienist removed the samples for testing and inspected the area.

The material has been confirmed as bonded asbestos which means it is attached to other material such as cement or vinyl and cannot be crumbled by light pressure.

All inspection work was done in accordance with work, health and safety laws, and the NSW Department of Education's Asbestos Management Plan. All work was completed by licensed and accredited asbestos contractors and monitored by occupational hygienists in strict accordance with all applicable legislation, regulations, policies, and guidelines.

Following the advice and protocols of independent asbestos hygienists and other experts the area will remain isolated.

For more information about asbestos, visit the NSW Health website:
