

Wyong High School

Works notification | 5 June 2026

Dear staff, parents and carers,

We recently engaged an arborist to inspect trees at Wyong High School following a series of bad weather events.

While most of the trees at the school were found to be in good health, a tree located near Building B was assessed as a safety risk to the school community and recommended for removal.

The area was immediately isolated and a classroom was relocated to an alternative space within the school until the tree was safely removed on Friday 29 May 2026.

The NSW Department of Education manages trees on school sites in accordance with local council regulations, our departmental guidelines and advice from qualified arborists.

We appreciate these trees mean a great deal to the community, but the arborist's advice means the department had no alternative but to act. Our duty of care to our students, staff and neighbours means responding to safety concerns when they're identified.

The school will be planting new replacement tree as part of our ongoing commitment to the area, and we will continue to monitor the space to support the local environment as it recovers and renews.

The department will continue to review and maintain the trees at Wyong High School annually.

If you have any questions about this work, please contact the NSW Department of Education using the details below.

Thank you for your understanding and support during this important work.
