

Wyong High School

Works notification | 7 May 2026

Dear staff, parents, and carers,

The health, safety, and wellbeing of all members of our school and the local community are our highest priorities.

Minor Building C repair

On Thursday 30 April 2026, 2 gaps were identified around an electrical conduit inside the office in Building C at Wyong High School.

The ceiling cavities in this building contain material identified as friable asbestos, meaning it can be crumbled, pulverised or reduced to a powder by hand pressure. There was no evidence of asbestos falling from the ceiling. As a precaution, the area was immediately isolated to restrict access to students, staff and school visitors.

An independent hygienist was engaged to conduct air monitoring and provide advice. All air monitoring to date across the site has returned results below the minimum detectable limit, which means it is consistent with acceptable levels in ambient air (i.e. <0.01 fibres/mL) as per SafeWork NSW guidelines. These results show that there is not a detectable level of asbestos fibres in the air in this area.

Work to reseal the gaps took place on Friday 1 May 2026. The hygienist returned to inspect the site and provide clearance for normal activities from Monday 4 May 2026.

Window replacement in Building D

We are relacing 2 windows in the library and stairwell in Building D. This work will be done on **Saturday 9 May 2026**.

The putty material in these windows is known to contain bonded asbestos, as listed on the school's asbestos register.

Working with hazardous materials

All work is done in accordance with work health and safety laws and the NSW Department of Education's Asbestos Management Plan. Safety measures are in place while work is done. All work is completed by licensed asbestos contractors and inspected by independent hygienists.

If you have any questions about this work, please contact the NSW Department of Education using the details below.

Thank you for your understanding and support during this important work.
