

Mullumbimby High School

Works notification

3 June 2021

Dear parents/carers,

During excavation works at Mullumbimby High School, suspected asbestos containing material was found in the ground between Block H and Block J. As a precaution, the area has been isolated and testing will be conducted by an independent hygienist to confirm the exact nature of the material and if remediation is needed.

If necessary, this area will be remediated in accordance with the Department of Education's Asbestos Management Plan and SafeWork NSW regulations. All work will be completed by licensed and accredited asbestos contractors, and monitored by occupational hygienists in strict accordance with all applicable legislation, regulations, policies and guidelines.

Testing will be completed to ensure the area has been fully remediated. The school will receive a clearance certificate before the area is open to students and staff.

The health, safety, and well-being of the school and the local community is our highest priority and we will continue to keep the community updated.

Thank you for your cooperation during this important work.
