

# Singleton High School

## Works notification | 2 March 2023

Dear school community,

We are providing a new accessible toilet and elevated covered walkway at Singleton High School as part of integration works. The new toilet is being built where the storeroom in Building P was located. The project is expected to be completed in March 2023.

Over the 2022 summer holidays we replaced ceiling sheets in the hallway and old storeroom in Building P (part of the construction area) to prepare the area for the rest of the integration works.

This work involved removing asbestos containing material in the ceiling sheets.

The area is within the construction site and remains out of bounds to anyone on site until the project is finished.

The school was closed during the holidays and no students or staff were in Building P when the removal works took place.

The area was remediated in accordance with SafeWork NSW regulations and the Department of Education's Asbestos Management Plan. All work was completed by licensed and accredited asbestos contractors and monitored by occupational hygienists in strict accordance with all applicable legislation, regulations, policies and guidelines.

Testing was completed to ensure the building had been fully remediated. The contractors received a clearance certificate so integration works on Building P could continue.

The health, safety and wellbeing of the school and local community is our highest priority. Thank you for your cooperation during this important work.
