

Singleton High School

Works notification | 19 November 2025

Dear staff, parents and carers,

Following the [works notification from 22 November 2024](#) regarding Singleton High School, this message is to update you on recent activities.

We previously outlined that there was window damage in Building D. The carpark was out of bounds at the time and reopened shortly afterwards.

Since then, we have:

- added additional bracing to the concrete panel below that window, as recommended by a structural engineer
- organised to add external structural bracing in Building D and strengthen the first floor linkway between buildings C and D. This is intended to increase resistance to forces such as wind or seismic activity.

We're also undertaking further geotechnical works on buildings C and D and the surrounding soil, as requested by an independent engineer, to inform the final scope of repairs. The geotechnical assessment is expected to be finished by 30 June 2026.

A heritage inspection was finished earlier this year and we have some further investigations to do.

The health, safety and wellbeing of all members of our school and the local community are our highest priorities.

Thank you for your cooperation during this important work.
