

Bass High School

Project update | October 2025

As part of the NSW Government's plan to rebuild public education, the NSW Budget is delivering \$3.9 billion for new and upgraded schools in Western Sydney. This targeted investment will ensure growing communities get access to a world class public education.

In [September 2025](#) we notified the school community of planned asbestos removal work as part of rebuilding Building H at Bass High School.

We are demolishing and rebuilding Building H to install:

- new toilets
- new changerooms
- general assistant workshop
- mower shed.

Temporary fencing has been installed around the building and will remain in place throughout this project. Alternative toilet facilities are available on the school site.

During the recent Spring School Holidays we completed the demolition of the building including the removal of all asbestos in the building from the school site, with preparations underway to begin construction of the new building during Term 4 2025.

The building works that will take place during Term 4 2025 and the Summer School Holidays will include:

- connection of services such as electricity, water and gas
- construction of the new girls toilet block
- internal fit-out of the toilets, changeroom, workshop and shed
- painting of walls and ceilings
- laying of new pavement around the building.

It is expected the new building will be open during Term 1 2026.

Managing construction

The construction site will continue to be fenced off and inaccessible for the remainder of the school year.

Construction vehicles and equipment, including cranes, cement mixers and jackhammers, will be used throughout this project.

Work vehicles will enter and exit from Arundle Road.

Work hours are between 7 am and 6 pm Monday to Friday, and 8 am and 1 pm on Saturday, in line with NSW Environment Protection Authority guidelines.

For more information on how construction will be managed, please visit the [School Infrastructure website](#).
