

Hunter Sports High School

Project update | November 2024

Dear staff, parents and carers,

We are writing to provide you with an update on the installation of air conditioning at Hunter Sports High School.

Funding has been allocated to install air conditioning in 63 rooms across the school, including classrooms, kitchens, science labs, Technology and Applied Studies workshops and art rooms.

The department appointed Marline Engineering Newcastle as the design consultant in October and planning for installation has begun.

The tender process to appoint a contractor to install the air-conditioning systems closes on 9 December 2024.

While work is scheduled to begin in January 2025, we will continue to explore opportunities to accelerate this work.

We will keep the community updated.

Thank you for your cooperation during this important work.
