Blakehurst High School
Works notification | 1 September 2026

Dear staff, parents, carers and neighbours,

We are removing 6 demountable buildings located near the sports court on the eastern side of Blakehurst High School on Wednesday 2 September 2026 between 7 am and 6 pm.

These demountables are no longer required by the school. By removing them, we can return valuable outdoor space to the school community.

The demountable buildings are known to contain undisturbed bonded asbestos containing material in the window putty, as listed in the School Asbestos Management Plan. As a requirement of transportation, the contractor will place a precautionary asbestos warning sign on the construction fencing.

No asbestos removal work will be done on the demountable buildings while they are on the school site.

What to expect during demountable removal

There will be an increase in heavy vehicle movements during removal.

Work will involve a mobile crane being delivered to the site and safely lifting sections of the building onto trucks. Entry and exit of construction vehicles will be from Forster Street.

Traffic management will be in place during this work. Please follow the directions of any temporary signage and traffic controllers as needed.

We will ensure works are carried out safely and efficiently to minimise impacts to the community.

For more information on how we manage construction, please scan the QR code or visit the School Infrastructure website: Managing construction impacts in your community (nsw.gov.au).

The health, safety and wellbeing of all members of our school and the local community are our highest priorities.

If you have any questions, please contact the NSW Department of Education on the details below.

Thank you for your cooperation during this important work.
