

Blakehurst High School

Works notification | 30 October 2025

Dear staff, parents and carers,

We would like to provide you with information about recent environmental investigations at Blakehurst High School.

In October 2025 we were notified about concerns raised by a member of the community that they suspected the school may have been contaminated on the school site which might be linked to rising health concerns.

In response to these concerns, we immediately engaged an independent hygienist to undertake a series of environmental tests.

On Saturday 25 and Sunday 26 October 2025, while the school was unoccupied, the following areas in the science facility were tested:

- storeroom
- preparation room
- break rooms (lunch/kitchen)
- science laboratories
- staffroom.

On Monday 27 October the test results came back and indicated no traces of contaminants at the school. The independent hygienist provided clearance to continue using the spaces as usual.

The health, safety and wellbeing of our school community are our highest priorities. If you have any questions about this work, please contact us using the details below.

Thank you for your understanding while we carried out these important investigations.
