

Matraville Sports High School

Works notification | 13 May 2026

Dear staff, parents and carers,

The health, safety, and wellbeing of all members of our school and the local community are our highest priorities.

We would like to update you on our work to manage asbestos in the shared ceiling voids of blocks A and C at Matraville Sports High School.

In our last works notification issued [28 April 2026](#), we described encapsulation works that involved installing false ceilings above the 2 stairwells leading from the ground to the first floor in blocks A and C.

Since then, we have conducted similar work in all other ground floor areas in Block A. These newly installed false ceilings have been inspected by an independent hygienist who provided clearance from Saturday 9 April 2026.

The ground floor of Block A will remain closed while we repaint the internal ceilings. This work is expected to take one week to finish, after which this floor will be reopened and made available for usual school activities.

Similar encapsulation works in Block C will start next week and are expected to take around 3 weeks to finish.

We will keep the community updated as these works progress.

All work with asbestos is done in accordance with work health and safety laws and the NSW Department of Education's Asbestos Management Plan. Safety measures are in place and all work is completed by licensed asbestos contractors and inspected by independent hygienists.

If you have any questions about this, please contact the NSW Department of Education using the details below.

Thank you for your understanding and support during this important work.
