

Beverly Hills Girls High School

School holiday works notification | 20 July 2023

School Infrastructure NSW regularly inspects and maintains school infrastructure as part of a comprehensive and ongoing program to keep school assets in optimal condition and ensure the safety and wellbeing of our school community across more than 2,200 NSW schools.

The school holidays are the ideal time for some maintenance projects as it means work can take place without disrupting learning.

This is to notify you of work where planned maintenance over the holidays involved unexpectedly working with hazardous materials such as asbestos or lead containing material.

Remediation activities during planned maintenance over the winter school holidays

During planned maintenance to refurbish the men's toilets in Building A at Beverly Hills Girls High School, assumed asbestos containing material was uncovered within the wall sheets.

The area was immediately cordoned off and an independent occupational hygienist was engaged to monitor the remediation.

Work to remove the wall sheets took place during the July school holidays, from the end of school on Friday 30 June to Monday 17 July 2023.

Work was done in accordance with SafeWork NSW regulations and the NSW Department of Education's Asbestos Management Plan. All work was completed by licensed and accredited asbestos contractors and monitored by occupational hygienists in strict accordance with all applicable legislation, regulations, policies and guidelines.

The men's toilets were inspected to ensure they had been fully remediated and the contractor received a clearance certificate to continue work.

The health, safety, and wellbeing of the school and the local community is our highest priority. Thank you for your cooperation during this important work.

If you have any questions about the work, please contact us on the details below.
