

# Ingleburn High School

## Works notification | 14 April 2025

Dear staff, parents, carers and neighbours,

We are preparing to remove asbestos-containing materials from a demountable classroom's supporting piers during the school holidays, following the building's removal from the Ingleburn High School site on Friday 11 April.

While the area was already cordoned off, and inaccessible to students and staff, the piers were covered in plastic sheeting.

The materials, which are listed in the school's asbestos register, are undisturbed and in good condition.

Remediation work will take place between Friday 18 April and Saturday 26 April.

NSW Health explains that "living or working with asbestos, or just being around it, is a low risk to your health as long as the asbestos is in good condition and not damaged".

Safety measures, including air monitoring, signage and workers wearing personal protective equipment, will be in place while work is being done.

All work will be completed by licensed asbestos contractors and monitored by independent hygienists, in accordance with work health and safety laws and the NSW Department of Education's Asbestos Management Plan.

When work is complete, the area will be inspected by an independent hygienist who will issue a clearance certificate to confirm it has been fully remediated.

The health, safety, and wellbeing of the school and the local community is our highest priority.

Thank you for your cooperation during this important work.
