

James Fallon High School

Works notification | 24 September 2024

Dear staff, parents and carers,

We are writing to provide an update on the mould investigation we notified you of on [12 September 2024](#) at James Fallon High School.

Building N update

An independent hygienist has recommended the woodwork storeroom ceiling in Building N be thoroughly cleaned before it can be reopened.

Access to the room is still restricted – to both students and staff – and there is no ongoing impact on school operations.

The room will remain closed until cleaning takes place during the Spring School Holidays and a hygienist provides clearance.

Ongoing inspections for moisture and water ingress began yesterday (Monday 23 September).

Administration building update

The hygienist has made several recommendations:

- inspect printer room and deputy principal's office for moisture
- investigate source of water ingress (began yesterday)

Access to the rooms will be restricted until cleaning takes place, also during the upcoming holiday period, and a hygienist provides clearance.

All inspections and remediation works will be conducted in accordance with recommendations from the independent hygienist.

The health, safety, and wellbeing of the school and the local community is our highest priority.

We will keep the community updated.

Thank you for your cooperation during this important work.
