

James Fallon High School

Works notification | 6 September 2024

Dear staff, parents and carers,

A staff member reported suspected mould in a woodwork storeroom in Building N at James Fallon High School on Wednesday 4 September 2024.

An independent hygienist inspected the room, on the same day, and recommended it be locked as a precaution until testing and any remediation work could be completed.

The hygienist will carry out testing and air monitoring on Tuesday 10 September and provide advice on any future remediation.

Safety measures and air monitoring will be in place while work involving hazardous materials occurs. All inspections and remediation works will be conducted in accordance with recommendations from the hygienist.

Use and access to the storeroom will be restricted until the hygienist advises it can be reopened.

The health, safety, and wellbeing of the school and the local community is our highest priority.

We will keep you updated.

Thank you for your cooperation during this important work.
