

Glenwood High School

Works notification | 1 April 2026

Dear families and staff,

Sydney Water has attended Glenwood High School and investigated the school's water supply after the NSW Department of Education reported an issue.

Sydney Water identified that treated water had been inadvertently supplied to the school's drinking water outlets due to a private plumbing fault within the school grounds.

NSW Health was immediately consulted, the school's water system was fully flushed and treated water is no longer being supplied to the school.

NSW Health has advised that the water was of high quality and is unlikely to have posed any health risk.

The health, safety and wellbeing of all members of our school and the local community are our highest priorities.

If you have any questions about this work, please contact the NSW Department of Education using the details below. For Sydney Water queries, please call 13 20 90.

Thank you for your understanding and support.
