

Mosman High School

Works notification | 7 May 2025

Dear staff,

Suspected mould was found on the walls of the Language staffroom in Building D at Mosman High School. Remediation work includes an environmental clean of the area with air scrubbers (a type of filtration device) and exhaust fans in place.

This work was completed on Tuesday 6 May 2025.

All work involving mould took place during school hours, with appropriate safety measures in place.

Use of the staffroom was temporarily restricted, and staff were provided with an alternative space while work was carried out.

Following the work a licensed contractor returned to inspect the room, and it was reopened for use.

Please be aware of the preventative measures as advised by [NSW Health's mould factsheet](#) to help avoid mould growth and follow these steps as best you can.

These measures include maximising natural ventilation where possible by opening windows and doors and using mechanical ventilation such as dehumidifiers as needed.

The health, safety and wellbeing of all members of our school and the local community are our highest priorities.

Thank you for your cooperation during this important work.
