

Hastings Secondary College

Project update | May 2023

Project overview

School Infrastructure NSW are upgrading Hastings Secondary College to support the student community. Hastings Secondary College comprises of the Port Macquarie Campus (PMC) and Westport Campus (WPC). The upgrade will involve works at both campuses.

The Port Macquarie Campus upgrade will deliver new and upgraded learning spaces, new Technological and Applied Studies (TAS) facilities, new Creative and Performing Arts (CAPA) building, a redeveloped school entry, and a new shared use multi-sports facility in partnership with Police Citizens Youth Clubs (PCYC) NSW.

The Westport Campus upgrade will deliver a relocated and upgraded administration office, new flexible learning spaces and a redeveloped school entry.

Progress summary

Westport Campus

Building L at WPC has been completed and was handed over to the school for use from Day 1 Term 2. Building L includes a new reception area and entrance to the school, as well as new meeting rooms for staff at the school.

In April 2023 asbestos remediation works were successfully completed in Building A. A clearance certificate was provided allowing demolition and refurbishment works to start in Building A, and this demolition work has now been completed.

Port Macquarie Campus

In November 2022, we informed the community about a modification to planning approval for the multi-sports facility building. This modification request has now been approved by the NSW Department of Planning and Environment and works associated with the modification will start.

The new CAPA building has seen significant progress. Formwork construction on the ground level has been completed and the installation of services is underway. Installation of structural steel and roof sheeting has also started.

Work hours will continue to be from 7 am to 6 pm, Monday to Friday, and 8 am to 1 pm on Saturdays. No work will take place on Sundays or on public holidays unless otherwise notified.

Managing Construction Impacts

School Infrastructure NSW plan for the likely impacts of the upgrade works on the local community, such as noise, vibration, dust, and traffic changes. We notify our neighbours before disruptive work takes place wherever possible. To learn more about how we manage construction impacts visit: edu.nsw.link/ConstructionImpacts.

Demolition works will be undertaken by hand. Rubble and waste materials will be loaded into small loader trucks for removal inside the site and all vehicles will be covered before exiting the site. Dust suppression will be in place including wetting down.

The health, safety, and wellbeing of the school and the local community is our highest priority. Thank you for your cooperation during this important work.

How can I stay up to date?
