

# Tweed River High School

## School holiday works notification | March 2023

School Infrastructure NSW regularly inspects and maintains school infrastructure as part of a comprehensive and ongoing program to keep school assets in optimal condition and ensure the safety and wellbeing of our school community across more than 2,200 NSW schools.

The school holidays are the ideal time for some maintenance projects as it means work can take place without disrupting learning.

Planned maintenance over the holidays may involve working with hazardous materials such as asbestos or lead containing material. This is to notify you of this work.

### Planned maintenance

As part of the major capital works project taking place at Tweed River High School, a water pipe servicing the new agricultural plot needs to be replaced. This will involve working with asbestos containing material within the construction site of the major capital works project.

Work to remove the material will take place **during the April school holidays between Friday 7 April and Sunday 20 May 2023**. Additional safety measures and monitoring will be put in place under the advice of an independent hygienist.

Work will be done in accordance with SafeWork NSW regulations and the NSW Department of Education's Asbestos Management Plan. All work will be completed by licensed and accredited asbestos contractors and monitored by occupational hygienists in strict accordance with all applicable legislation, regulations, policies and guidelines.

The area will be inspected to ensure it has been fully remediated and the school will receive a clearance certificate before construction resumes on site of the major capital works.

The health, safety, and wellbeing of the school and the local community is our highest priority. Thank you for your cooperation during this important work.

If you have any questions about the work, please contact us on the details below.
