

Castle Hill High School

Works notification | 14 September 2026

Dear staff, parents and carers,

On Friday 11 September 2026 a wall was slightly damaged by a chisel in the woodworking room at Castle Hill High School.

The gyprock sheeting was damaged on the surface and not completely punctured. This wall does not contain asbestos as per the School's Asbestos Management Plan.

As a precaution the room was closed.

A contractor repaired the damaged wall on Saturday 12 September 2026.

In addition, on the weekend brackets were screwed into walls around the school to further support the air monitors. The brackets are a proactive solution to ensuring the air monitors are not subject to interference. All works were done with involvement from an independent hygienist.

The woodworking room will remain closed until the area is cleared by the independent hygienist to reopen.

All work was done in accordance with work health and safety laws and the NSW Department of Education's Asbestos Management Plan. Safety measures were in place while work was being done. All work was completed by licensed asbestos contractors.

The health, safety, and wellbeing of all members of our school and the local community are our highest priority.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your understanding and support during this important work.
