

Dear staff and parents/carers,

## Fragment of asbestos containing material found

During a recent routine inspection, one small fragment of suspected asbestos containing material was found on the ground near the hall.

The fragment was found in an area listed on the school's site-specific asbestos management plan and removed for testing.

The inspection was completed, and no further actions were recommended. A repeat inspection will be carried out in 3 months and following periods of heavy rain.

## Mould remediation in kitchen storeroom

Mould was recently found in a kitchen storeroom in Building A. Based on the advice of an independent hygienist, the storeroom was then closed and made inaccessible to students and staff.

Work to remove mouldy items and remediate the area began on Saturday, 18 May 2024 and will continue for approximately one week.

All work will take place outside of school hours, with additional safety measures and air monitoring in place while work is being done. All inspections and remediation works will be conducted in accordance with the independent hygienist's recommendations. Access to the room will be restricted until a clearance certificate is received.

Our highest priority is the health, safety and wellbeing of the school and local community.

If you have any questions about this work, please contact the NSW Department of Education using the details below.
