

Castle Hill High School

Works notification | 23 May 2023

Dear staff and parents/carers,

Further to our notification about subsoil testing on Saturday 20 May in an entrance area to the sports oval, building fragments were uncovered beneath the surface and are currently being tested. We will notify you of the outcome of the testing as soon as it is known.

As a precaution, the Department has cordoned off the area and will carry out remediation works on Saturday 27 May 2023. The remediation works will involve removing a layer of subsoil to even the ground level and then capping the area with concrete. As an additional precaution, the area beneath the adjacent demountable will also be inspected.

The work will be carried out in accordance with the advice of the independent hygienist, with work, health, safety laws and the Department's Asbestos Management Plan. Please be assured that all works will be completed by licensed and accredited asbestos contractors, and monitored by occupational hygienists.

The health, safety, and wellbeing of the school and the local community is our highest priority. Thank you for your cooperation during this important work.
