

Westfields Sports High School

Works notification | 25 June 2026

Dear parents and carers,

Works underway for replacement of exterior panels on Block S

We are aware of ongoing issues with the exterior panels on Block S which contains the woodwork and metal work classrooms. This building was completed in 2021 as part the wider upgrades to the school.

Some panels have shown signs of cracking and fragments have come loose. While repairs were made last year, further work is required to ensure the safety of the school community.

What's happened so far

- Over several weekends since 15 May 2026, we have been working on temporary make safe measures around the school.
- Key activities have included removing panels, installing fire retardant mesh and shade cloth on various walls and stairwells, and fitting catch nets for safety around Block S.
- We have confirmed that all external façade panels on Block S will be replaced.

Upcoming works and what to expect

- Additional make safe works are planned for Saturday 27 June and Sunday 28 June 2026.
- Work will take place from 6:30 am to 4 pm on both days.
- To support this, 3 scissor lifts (19-foot) will arrive on Friday 26 June and stay onsite during the work.
- All equipment will be removed early on Monday 29 June before school starts.

The safety of the staff and students is our top priority, and these upcoming works will continue the safety improvements already underway. Thank you for your understanding and patience as we work together to keep the school safe and secure.
