

# Swansea High School

Works notification | 2 August 2023

Dear staff and parents/carers,

As part of detailed planning for flooring refurbishment works at Swansea High School, we are testing the glue under the tiles in the Staff Study room in Building B. The tile glue is suspected to contain asbestos material.

The room is being safely used at present as the glue is located under vinyl tiles that are undisturbed and under the carpet.

The tile glue will be tested by an independent occupational hygienist on 17 August 2023, outside school hours.

Safety measures, including air monitoring, will be in place and all work zones will be out of bounds while work is carried out.

All work will be done in accordance with SafeWork NSW regulations. All work will be completed by licensed and accredited contractors and monitored by occupational hygienists in strict accordance with all applicable legislation, regulations, policies, and guidelines.

Following testing, planning will continue for any remediation that may be required before the flooring work starts. We will keep the community informed.

Thank you for your cooperation during this important work.
