

Whitebridge High School

Works notification | 16 June 2025

Dear staff, parents and carers,

We are replacing a broken window in a Building D classroom at Whitebridge High School.

The putty material in the window is known to contain bonded asbestos. The glass in the window has been temporarily secured. As the putty is undisturbed and in good condition, the area has remained in use.

NSW Health explains that “living or working with asbestos, or just being around it, is a low risk to your health as long as the asbestos is in good condition and not damaged”.

Work to replace the window and putty material is planned to take place on Saturday 21 June 2025.

Safety measures including air monitoring, signage and workers wearing personal protective equipment will be in place during the work.

All work will be done in accordance with work health and safety laws and the NSW Department of Education’s Asbestos Management Plan. All work will be completed by licensed asbestos contractors and inspected by an independent hygienist who will provide clearance to continue using the classroom.

The health, safety and wellbeing of all members of our school and the local community are our highest priorities.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your cooperation during this important work.
