

# Windsor High School

## Works notification | 30 October 2025

### Investing in our schools

The NSW Government is committed to expanding high potential and gifted education (HPGE) opportunities in NSW public schools. This includes a multi-million dollar investment into the HPGE Partner School Program.

Under the program, 33 high schools including Windsor High School will receive facility upgrades to accommodate increased enrolments, broaden educational opportunities and facilitate the delivery of tailored HPGE offerings.

### Asbestos removal

During construction work to upgrade the Music rooms in Building D at Windsor High School, material suspected to contain asbestos was found in the housing of an unused hot water cupboard.

The area was immediately isolated and securely covered. The space was already closed to staff and students due to construction. As a precaution an independent hygienist was engaged to collect a sample for testing and provide advice.

Testing confirmed that the material contained bonded asbestos. NSW Health explains that “living or working with asbestos, or just being around it, is a low risk to your health as long as the asbestos is in good condition and not damaged”.

This location is not in an area identified on the School Asbestos Management Plan (SAMP). The plan will be updated to include this recent find as required. Work to remove the asbestos-containing material has been organised and will take place shortly, outside of school hours.

All work will be done in accordance with work health and safety laws and the NSW Department of Education’s Asbestos Management Plan. Safety measures will be in place while work is being done. All work will be completed by licensed asbestos contractors and inspected by independent hygienists before construction can recommence in this area.

The health, safety, and wellbeing of all members of our school and the local community are our highest priorities.

Thank you for your cooperation during this important work.
