

Doonside Technology High School

Works notification | 24 September 2026

Dear staff, parents, and carers,

On Wednesday 15 September 2026, a staff member found pieces of material suspected to contain asbestos on the ground, in between the sports court and sports oval at Doonside Technology High School.

As a precaution, the area was closed to students and staff. An independent hygienist was engaged to undertake testing and provide advice.

Test results confirmed the fragments contained bonded asbestos.

This location is not in an area identified on the School Asbestos Management Plan (SAMP). The register will be updated to include this recent find as required.

Work to remove the material and clear the surrounding soil took place on Friday 18 September 2026, outside of school hours. An independent hygienist inspected the area and provided clearance for it to reopen.

All work was carried out by licensed asbestos contractors in accordance with work health and safety laws and the NSW Department of Education's Asbestos Management Plan.

The health, safety, and wellbeing of all members of our school and the local community are our highest priorities.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your understanding and support during this important work.
