

Scone High School

School holiday works notification - Summer | 2024/25

We regularly inspect and maintain schools to ensure the safety and wellbeing of our school communities.

The school holidays are the ideal time for a lot of maintenance and project work to take place across the state without disrupting learning.

Planned work over the Summer School Holidays

We will be doing work at your school during the Summer School Holidays. This period may include from the end of the school day on Friday 20 December 2024 up to the first day of Term 1, Friday 31 January 2025.

As part of planned work, we will be installing a permanent encapsulation to the roof cavity in Building C at Scone High School. This will involve removing the temporary encapsulation; core flute layer on the ceiling and replacing the existing ceiling panels with a durable Colourbond sheeting material.

Encapsulated and undisturbed material in the ceiling cavity of this building is known to contain friable asbestos as listed on the school's asbestos register. Friable asbestos can be crumbled, pulverised or reduced to a powder by hand pressure.

Work to encapsulate the asbestos-containing material in the ceiling cavity is scheduled to take place in the upcoming Summer School Holiday period 2024–25. All work involving asbestos-containing materials will take place outside of school hours.

Building C will be inspected by the independent hygienist and a clearance certificate will be issued before Day 1 Term 1 2025.

All work will be done in accordance with work health and safety laws and the NSW Department of Education's Asbestos Management Plan. All work will be completed by licensed asbestos contractors and monitored by independent hygienists.

The health, safety and wellbeing of the school and the local community is our highest priority.

Thank you for your cooperation during this important work.
