

Morisset High School

School holiday works notification – Summer | 2025/2026

Dear staff, parents and carers,

School holidays are the ideal time to undertake maintenance and project work across the state without disrupting learning.

Proactive maintenance over the holidays

During the summer school holidays, as part of our proactive maintenance schedule, we tested areas of Morisset High School known to have asbestos-containing materials, as listed on the School Asbestos Management Plan (SAMP). These tests revealed minor damage to the ceiling and wall cavities of 12 classrooms on the upper level in buildings 1A, 2A and 3A.

The ceiling and wall cavities in these buildings contain material identified as friable asbestos, meaning it can be crumbled, pulverised or reduced to a powder by hand pressure.

Work to reseal the ceiling and wall cavities of these classrooms took place on Thursday 22 January 2026.

Once the work was finished, the classrooms were inspected by an independent hygienist to confirm they were fully remediated, and the school received clearance to reopen them for use for Day 1, Term 1 2026.

All work involving asbestos-containing materials was undertaken with air monitoring in place. Air monitoring results to date are below the minimum detectable limit, which means it is consistent with acceptable levels in ambient air (i.e. <0.01 fibres/mL) as per SafeWork NSW guidelines.

All work was done in accordance with work health and safety laws and the NSW Department of Education's Asbestos Management Plan. All work was completed by licensed asbestos contractors.

The health, safety and wellbeing of all members of our school and the local community are our highest priorities.

If you have any questions about this work, please contact the NSW Department of Education using the details below.

Thank you for your ongoing support as we work together with Morisset High School to deliver this important work.
