

# Ku-ring-gai High School

Works notification | 21 July 2023

Dear staff and parents/carers,

As part of planning for roof replacement works at Ku-ring-gai High School, some lead containing material was identified within the roof cavities of Buildings A, B, C, D, E, and I.

As a result, some precautionary remediation will occur within the roof cavities of these buildings before roofing works can start on Saturday 5 August 2023. All work involving lead will take place outside school hours.

All buildings remain safe for general occupation as the affected areas are located within the roof cavities, sealed off and therefore inaccessible to students, staff and visitors.

Safety measures, including air monitoring, will be in place and all work zones will be out of bounds while work is carried out.

All work will be done in accordance with SafeWork NSW regulations and monitored by occupational hygienists in strict accordance with all applicable legislation, policies, and guidelines.

The roof cavities will be inspected by an independent hygienist to confirm they have been fully remediated, and the contractor will receive a clearance certificate before works can progress.

The roof replacement work is an ongoing project beginning from August 2023. Work will take place in stages with each block taking approximately 14 weeks to complete.

The roof work has been scheduled in consultation with your school leadership to minimise disruption to teaching and learning.

The health, safety, and wellbeing of the school and the local community is our highest priority.

Thank you for your cooperation during this important work.
