

# Evans High School

Works notification | 13 February 2023

Dear staff and parents/carers,

During installation of a new concrete path between buildings B0HC and B0EL at Evans High School, suspected fragments of asbestos containing material were found in the excavated spoil. Work immediately stopped and the area remains fenced off. The pedestrian access nearby was isolated with barricades, cones and safety tape.

We are following all the advice and protocols of independent asbestos hygienists and other experts.

Testing will be conducted by an independent hygienist to confirm the nature of the material and if remediation is needed.

If necessary, this area will be remediated in accordance with SafeWork NSW regulations and the NSW Department of Education's Asbestos Management Plan. All work will be completed by licensed and accredited independent asbestos contractors and monitored by occupational hygienists in strict accordance with all applicable legislation, regulations, policies and guidelines.

The area will be inspected to ensure it has been fully remediated and the school will receive a clearance certificate before the area is re-opened to students and staff.

The health, safety, and wellbeing of the school and local community is our highest priority, and we will continue to keep the community updated.

Thank you for your understanding during this important work.
