

# Warners Bay High School

## Works notification | 13 August 2024

Dear staff, parents, and carers,

On Thursday 8 August 2024, a staff toilet drain in Building D at Warners Bay High School flooded. Plumbing repairs and cleaning were undertaken on affected areas.

As a result of this drain flooding, an area of flooring was damaged in a nearby classroom. It was reported that vinyl tiles suspected to contain asbestos material were lifting under the existing carpet in this classroom.

This room was cordoned off and isolated from students and staff. An independent hygienist was engaged to install air monitoring, conduct testing and provide advice.

Testing received on Friday 9 August 2024 has confirmed the material in the vinyl tiles did not contain asbestos and the room was reopened for use.

The health, safety, and wellbeing of the school and the local community is our highest priority.

Thank you for your cooperation during this important work.
