

Tumbarumba High School

Works notification | 3 November 2025

Dear staff, parents and carers,

On Monday 27 October 2025 a staff member discovered displaced and broken vinyl floor tiles in the archives/supplies room of Building A at Tumbarumba High School.

The vinyl tiles are suspected to contain bonded asbestos, as noted in the school's asbestos management plan. As a precaution, the broken tiles have been covered with plastic and the room was locked.

An independent hygienist will attend the site on Tuesday 4 November 2025 to investigate and conduct testing. All work involving asbestos-containing materials will take place outside of school hours.

All work will be done in accordance with work health and safety laws and the NSW Department of Education's Asbestos Management Plan. Safety measures will be in place while work is being done. All work will be completed by licensed asbestos contractors and inspected by an independent hygienist with a clearance certificate issued before the room is reopened.

For more information on asbestos and health risks, please visit the [NSW Health Website](#).

The health, safety, and wellbeing of all members of our school and the local community are our highest priorities.

Thank you for your cooperation during this important work.
