

# Baulkham Hills High School

## Works notification | 16 March 2026

Dear staff, parents and carers,

On Tuesday 10 March 2026, during work to upgrade the library, vinyl tiles suspected to contain asbestos were found by contractors at Baulkham Hills High School.

This area was not identified on the School Asbestos Management Plan (SAMP).

NSW Health explains that “living or working with asbestos, or just being around it, is a low risk to your health as long as the asbestos is in good condition and not damaged”.

The library is within the construction site, with access restricted from students and staff. The carpet was laid back down awaiting removal.

On Saturday 28 March 2026, all suspected asbestos-containing materials will be removed under the guidance of an independent hygienist who will issue a clearance certificate before work restarts. Safety measures, including air monitoring, will be in place. All asbestos-related work will be done in accordance with work health and safety laws and the NSW Department of Education’s Asbestos Management Plan. All work will be completed by licensed asbestos contractors.

The health, safety, and wellbeing of the school and the local community are our highest priority.

Thank you for your understanding and support during this important work.
