

Glendale Technology High School

Works notification | 10 March 2023

Dear staff and parents/carers,

As part of planning for roof replacement works at Glendale Technology High School, asbestos containing material was identified in the roof capping that connects Buildings E and Building F.

An independent occupational hygienist has attended the school on Thursday 9 March to inspect the area and test results have confirmed the presence of asbestos containing material in the roof capping.

As a result, some precautionary remediation will occur over the upcoming weekend between Saturday 11 March and Sunday 12 March 2023.

Safety measures were put in place before school on Friday 10 March 2023, including air monitoring. The covered walkway in Building E next to the roof has been cordoned off and will remain out of bounds while work is carried out.

All work will be done in accordance with SafeWork NSW regulations and the NSW Department of Education's Asbestos Management Plan. All work will be completed by licensed and accredited contractors and monitored by occupational hygienists in strict accordance with all applicable legislation, regulations, policies, and guidelines.

Affected areas will be inspected by an independent hygienist to confirm it has been fully remediated, and the school will receive a clearance certificate. Following this work, further planning for roof replacement works will continue.

Thank you for your cooperation during this important work.
