

# Glendale Technology High School

## Works notification | 16 March 2023

Dear staff and parents/carers,

Accidental water damage over the weekend of March 11 and 12 impacted the flooring in six rooms in Building B at Glendale Technology High School.

As part of the repairs, asbestos containing material in vinyl floor tiles under the carpets will need to be removed. The material is bonded asbestos, which means it cannot be crumbled by light pressure.

The rooms are still being used and the tiles are undisturbed and in good condition.

The material will be removed from the rooms over two consecutive weekends on:

- Sunday 19 March 2023
- Saturday 25 March 2023

All works involving asbestos containing materials will take place outside of school hours, with additional safety measures and monitoring in place before works start.

Each classroom will be cordoned off before works start and will remain out of bounds to students and staff until the removal and associated maintenance work is finished in that room.

Work will be done in accordance with SafeWork NSW regulations and the NSW Department of Education's Asbestos Management Plan. All work will be completed by licensed and accredited asbestos contractors and monitored by occupational hygienists in strict accordance with all applicable legislation, regulations, policies, and guidelines.

The rooms will be inspected by an independent hygienist to confirm it has been fully remediated, and the school will receive a clearance certificate before each classroom is reopened to students and staff.

The health, safety, and wellbeing of the school and the local community is our highest priority. Thank you for your cooperation during this important work.
