# Warrawong High School

## Works notification | 8 May 2024

Dear staff, parents/carers,

This notification is to provide you with an update about the mould remediation work that has been taking place at Warrawong High School.

On 2 April 2024 we notified you about mould that was detected in 2 science labs and the library. Work to remediate these areas was completed in the Autumn School Holidays.

During this work, mould was found in other areas of the school, including a language classroom in Building B and 3 storerooms (in Buildings A, G and F). These areas were added to the remediation scope of work.

The science labs and library have received a clearance certificate and are open for use.

The language classroom in Building B will remain inaccessible as we wait for the final clearance certificate from the independent hygienist. Students and staff who normally use this room will be temporarily relocated to other learning areas for their classes.

The 3 storerooms have been sealed and will remain inaccessible until work can be completed at a later date.

All work involving hazardous materials has taken place outside of school hours, with additional safety measures and air monitoring put in place while work was done. All inspections and remediation works were conducted in accordance with recommendations from the independent hygienist.

The health, safety, and wellbeing of the school and the local community is our highest priority.

If you have any questions, please contact School Infrastructure NSW on [schoolinfrastructure@det.nsw.edu](mailto:schoolinfrastructure@det.nsw.edu) or during business hours on 1300 482 651.
