

# Galston High School

## Works notification | 24 September 2024

Dear staff, parents and carers,

The possible presence of mould was recently reported in several storerooms and the shipping container at Galston High School.

As a precaution, the storerooms and shipping container were locked and made out of bounds to students and staff.

An independent hygienist conducted an inspection and took samples for testing on Wednesday 18 September. The test results have since returned positive results for mould in some areas.

We are now planning remediation work for these areas.

The rooms will remain out of bounds until remediation is complete and the hygienist advises they can be reopened.

Any work involving hazardous materials will take place with safety measures in place while work is being done.

All inspections and remediation works will be in accordance with recommendations from the independent hygienist.

The health, safety, and wellbeing of the school and the local community is our highest priority.

We will keep you updated. If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your cooperation during this important work.
