

# Muirfield High School

## Works notification | 13 May 2025

Dear staff, parents and carers,

As part of our planned maintenance, the following replacement works will be conducted at Muirfield High School.

- 2 cracked louvres on the exterior of the Art Block (Building C), which are assumed to contain bonded asbestos
- 2 exterior gables on a storeroom (Building U)
- 2 ceiling panels in locked electrical rooms; one located in the Administration Building and another in a general classroom block (Building D).

NSW Health explains that “living or working with asbestos, or just being around it, is a low risk to your health as long as the asbestos is in good condition and not damaged”.

As the existing materials are undisturbed and in good condition, all areas have remained in use.

Work to replace the gables, ceiling panels and window louvres is planned to take place on Saturday 7 June 2025.

Safety measures including air monitoring, signage and workers wearing personal protective equipment will be in place during the work.

All work involving asbestos-containing materials will take place outside of school hours.

All work will be done in accordance with work health and safety laws and the NSW Department of Education’s Asbestos Management Plan. All work will be completed by licensed asbestos contractors and inspected by an independent hygienist.

The health, safety and wellbeing of all members of our school and the local community are our highest priorities.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your cooperation during this important work.
