

Muirfield High School

Works notification | 3 March 2023

Dear parents/carers and staff,

Works are continuing at Muirfield High School to remediate the rooms on the top floor of Building C2 damaged by a recent fire. The impacted rooms include a home economics classroom, commercial kitchen, prep room, storeroom, and laundry.

Update on works to date

Make safe works on the ground floor of Building C2 (notified on 8 February 2023) were completed and the woodwork workshops reopened for teaching and learning from Monday 13 February 2023.

The top floor of the building remains cordoned off and out of bounds for staff and students.

Works to make safe water, gas and electricity services and disconnect appliances in the impacted rooms has finished. This has allowed us to start work on removing and disposing fire impacted material on the top floor.

Temporary home economics classrooms at Muirfield High School

We have completed site preparation work for the installation of two temporary home economics classrooms on the grass area beside the covered sporting court (see map overleaf).

The demountable buildings are being delivered and installed on the school site Monday 6 March 2023. They will then be fitted out and connected to services.

Temporary fencing is in place around the perimeter of the site and will remain in place until the classrooms are opened for teaching and learning. This is expected this month.

Keeping you informed

The local School Infrastructure team will continue to work closely with the school on any additional arrangements required to support school operations.

We will continue to keep the school community updated on works at Muirfield High School.

Thank you for your patience and understanding.
