

# Brisbane Water Secondary College Umina Campus

## Works notification | 6 February 2025

Dear staff, parents and carers,

During regular maintenance work, a section of external cladding came loose near the Turtle Room in Building A at Brisbane Water Secondary College Umina Campus.

Material in the cladding contains bonded asbestos as listed on the school's asbestos register. NSW Health explains that 'living or working with asbestos, or just being around it, is a low risk to your health as long as the asbestos is in good condition and not damaged'.

Work to repair the cladding material took place during the recent school holidays on Thursday 17 January 2025.

All work involving asbestos-containing material was done in accordance with work health and safety laws and the NSW Department of Education's Asbestos Management Plan. All work was completed by licensed asbestos contractors and monitored by independent hygienists.

Following the work, the building was inspected by an independent hygienist and clearance was provided.

The health, safety and wellbeing of the school and the local community is our highest priority.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your cooperation during this important work.
