

Terrigal High School

Works notification

15 December 2021

Dear parents/carers,

Upcoming maintenance works at Terrigal High School will require working with asbestos containing material. Testing conducted by an independent hygienist has confirmed that the material is bonded asbestos, which means it is attached to other material such as cement or vinyl and cannot be crumbled by light pressure.

The area will be remediated in accordance with the Department of Education's Asbestos Management Plan and SafeWork NSW regulations. All work will be completed by licensed and accredited asbestos contractors, and monitored by occupational hygienists in strict accordance with all applicable legislation, regulations, policies and guidelines.

The material is scheduled to be removed from Block B during the upcoming school holidays between Monday 20 December 2021 and Friday 28 January 2022. The area is safe at present and, as a precaution, it will be cordoned off and remain out of bounds until remediation is completed.

Testing will be completed to ensure the area has been fully remediated. The school will receive a clearance certificate before the area is open to students and staff. We will keep you informed if further material is found which requires removal.

Please be assured that the removal of this material will not pose a risk to the local community.

A comprehensive COVID-19 Safety Plan will be in place for the site and the contractor will enforce strict compliance. Our construction sites will follow all current health guidelines.

Safety is the number one priority for School Infrastructure NSW and we are following all health advice in relation to construction sites.

Thank you for your cooperation during this important work.
