

Narooma High School

Works notification | 24 April 2026

Dear staff, parents and carers,

The health, safety, and wellbeing of all members of our school and the local community are our highest priorities.

During a routine inspection on Friday 20 March 2026, an independent hygienist identified damage to the subfloor surfaces at Narooma High School in the cleaner's storeroom, movement area and external covered area subfloor in Building B.

The subfloor areas are not typically accessed by students and staff. As a precaution, these have been isolated. The areas above the subfloors will continue to be used as normal.

The material has been confirmed as friable asbestos. Friable asbestos can be crumbled, pulverised or reduced to a powder by hand pressure.

This location is not in an area identified on the School Asbestos Management Plan (SAMP). The register will be updated to include this recent find as required.

Work will take place during Term 2 and is expected to be completed by Saturday 30 May 2026, weather permitting. All work involving asbestos containing materials will take place outside of school hours with safety measures such as PPE, air monitoring and temporary fencing in place.

All work will be done in accordance with work health and safety laws and the NSW Department of Education's Asbestos Management Plan. Safety measures will be in place while work is being done. All work will be completed by licensed asbestos contractors and inspected by independent hygienists.

For more information about asbestos, please visit the [NSW Health website](#) or scan the QR code.

If you have any questions about this work, please contact the NSW Department of Education using the details below.

Thank you for your understanding and support during this important work.
