

Dear staff and parents/carers,

During work to restore the heritage stone at the NSW School of Languages, asbestos containing material was found in the ceiling cavity of buildings C, D and the Administration Building (Building EE) and the subfloor of the Administration building.

Entry to the subfloor was immediately restricted, so it could not be accessed by students or staff.

Regular air monitoring will continue for the next 3 weeks or until the areas can be remediated.

We will continue to keep you updated.

All work involving asbestos containing materials will take place outside of school hours.

All work will be done in accordance with work, health and safety laws and the NSW Department of Education's Asbestos Management Plan. All work will be completed by licensed and accredited asbestos contractors and monitored by independent hygienists in strict accordance with all applicable legislation, regulations, policies, and guidelines.

The health, safety and wellbeing of the school and the local community are our highest priority.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your cooperation during this important work.
