

Quakers Hill High School

School holiday works notification – Autumn | 2025

Dear staff, parents and carers,

After heavy rainfall on Monday 28 April 2025, fragments of building material suspected of containing asbestos were found on the ground in the area behind the car park next to Building J at Quakers Hill High School.

This area is listed on the school's Site-Specific Asbestos Management Plan (SSAMP). The area is out of bounds to staff and students.

On the same day, we engaged an independent hygienist to inspect the site and remove samples for testing.

On Tuesday 29 April, test results confirmed the pieces contained bonded asbestos. NSW Health explains that "living or working with asbestos, or just being around it, is a low risk to your health as long as the asbestos is in good condition and not damaged".

The hygienist removed all visible fragments from the site.

All work was done in accordance with work health and safety laws and the NSW Department of Education's Asbestos Management Plan. Safety measures were in place while work was done.

On Wednesday 30 April after a thorough inspection of the area, the independent hygienist was satisfied all visible fragments had been removed and issued a clearance certificate.

The health, safety, and wellbeing of all members of our school and the local community are our highest priorities.

Thank you for your cooperation during this important work.
