

Granville Boys High School

Works notification

30 October 2020

Dear parents/carers,

Further to our works notification on Thursday 29 October 2020, items suspected to contain asbestos at Granville Boys High School have now been safely removed from site by a qualified hygienist. Further testing following these works has however confirmed no asbestos containing material was present. This work was undertaken as part of our commitment to properly address and manage any suspected asbestos containing materials at our schools.

The works were conducted in accordance with the Department of Education's Asbestos Management Plan and SafeWork NSW requirements.

All air monitoring samples collected have returned results consistent with normal air quality (i.e. <0.01 fibre/mL).

The school has received a clearance certificate and the area is open to students and staff.

The health, safety, and well-being of the school and the local community is our highest priority. Thank you for your cooperation during this important work.
