

Dear staff and parents/carers,

We are remediating mould in 2 classrooms on the first floor of Building 1 at Inner Sydney High School. This was suspected to be caused by heavy rainfall that entered the classrooms through the roof. The rooms have been locked and made inaccessible to students and staff.

We will also inspect the 2 ground floor classrooms below the affected rooms and remediate if needed.

Work will take place on Saturday 8 June and Sunday 9 June. Work involves removal and disposal of carpet tiles and plywood sheeting, floor scrubbing, disinfection, drying and stain removal of timber floorboards, and air scrubbing.

The rooms will remain inaccessible while repairs are done, and safety measures and air monitoring will be put in place.

After the mould is fully remediated, work will be scheduled to replace the underlays and carpets and install roof flashing on the building to prevent leaks. We will keep the community updated.

All work involving hazardous materials will take place outside of school hours, with safety measures and air monitoring in place while work is being done. All inspections and remediation works will be conducted in accordance with recommendations from the independent hygienist.

The classrooms will be inspected by the independent hygienist to confirm they have been fully remediated, and a clearance certificate will be issued before the classrooms are reopened.

The health, safety and wellbeing of the school and the local community are our highest priority.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your cooperation during this important work.
